

HISTORY: SNAKES & LIZARDS

ANIMAL DETAILS

Name _____
Species (Sub species, if known) _____
Sex _____ Approximate Age _____
Where did you get it? _____
How long have you had it? _____
When and with what was it last wormed? _____

HOUSING

VIVARIUM

What is the vivarium made of? _____
What are the measurements of the vivarium? _____
How is ventilation provided? _____
Where is it located? _____

LIGHTING

Is there any UV provision (state type of tube and how frequently it is changed)? _____
How high above the surface is it positioned? _____
Is there a spot/basking light (state type & wattage)? _____
Does it have a guard around it? _____
How long is each of the lights on for each day? Summer _____ Winter _____

HEATING

What type of heater is used? _____
Does it have a guard around it? _____
Is it connected to a thermostat? _____
State the background temperatures: Summer Day _____ Night _____
Winter Day _____ Night _____
Do you use a min/max thermometer? _____
What is the temperature under the spot/basking light? _____
Is all the heating & lighting equipment at the same end of the vivarium? _____
What is the temperature difference between the hot end and the cool end? _____

HUMIDITY

What is the humidity? _____
Is there a humidity gauge? _____
How is it provided? _____

DÉCOR

What substrate is used? _____
How deep is the substrate? _____
How frequently is the vivarium cleaned out? _____
What cleaning solution is used? _____
Is there a covered, damp moss/peat container? _____
Describe the hide boxes. _____

What other items of décor are there (rocks, branches, drain pipes, plants – plastic or real, etc.)?

NUTRITION

List ALL food items including quantity & frequency: _____

How often is the animal fed? _____
What supplements are provided and how often? _____
What are the insects fed on? _____
What size is the water container? _____

SOCIAL GROUPING

What other individuals of the same /different species share the accommodation? _____

How many of each sex? Female _____ Male _____
Do they tend to mix with or ignore each other? _____
Is there at least one hid per individual? _____

HANDLING

How frequently is it handled? _____
Describe how this is done. _____

COOLING DOWN

Please describe fully the process of cooling down, length of cooling down and warming back up.
